

Take Action!

Let your voice be heard!

Your voice counts as we invest in building a newer and cleaner power system that creates jobs, delivers significant economic benefits to local communities, and is also safe and affordable.

Write to your local representatives

You can take action right now and show your support for renewable energy by sending a letter to your provincial representative to let them know renewable energy is part of the solution to a globally credible climate change policy.

Follow three easy steps on the Friends of Wind and Solar homepage to send a prepared letter to your provincial representative to say you want them to demonstrate political leadership on climate change.

Want to write your own letter? We will help you find your MLA/MPP.

Consult the Write Your Provincial Representative page on the Friends of Wind and Solar website to find your local provincial representative.

Submit a letter to your local newspaper

You can also write a letter to the editor in your local community newspaper to help raise awareness, correct misinformation and voice your opinions.

Together we can ensure that Canada is a world leader in the development of clean, affordable wind and solar energy.

Check out example letters to the editor on our Friends of Wind and Solar website, under the *Spread the Word* section.

Do you need help finding your local community newspaper?

Consult the Newspapers Canada website at www.newspaperscanada.ca/database to find community newspapers in your area.

Check out WindFacts!

The *WindFacts* website contains facts and resources that address a number of areas of key interest to Canadians: how wind works, health, community, affordability and environment and wildlife.

By logging in through top social media programs such as Facebook, Twitter and LinkedIn, visitors can submit questions about wind energy through the *Ask Us!* section.

Visit www.windfacts.ca today to get the facts on wind energy and join the conversation.

Wind for my community!

To see and hear real stories from individuals living near wind farms, visit the www.windformycommunity.ca website.

Check out Solar Energy 101!

For factual information on solar energy and how solar energy technology works visit www.cansia.ca/solar-energy-101.

Subscribe to SolarBEAT!

SolarBEAT provides a bi-monthly roundup of topical solar industry news.

For current and past issues of SolarBEAT, visit the SolarBEAT page www.cansia.ca/solar-beat.

Join the Social Media Circle

CanWEA and CanSIA regularly update our social media networks with industry news.

- Follow CanWEA (@CanWEA) and CanSIA (@CanadianSIA) on [Twitter](#) for up to date interesting facts and information on wind and solar energy around the world.
- Like Canadian Wind Energy Association (CanWEA) and Canadian Solar Industries Association (CanSIA) on [Facebook](#) and join the conversation about our energy future.
